

Eos Unit Price

QUICKLY PRODUCE UNIT PRICES AND BID PROPOSALS

Eos Unit Price is designed for the Sage Timberline Estimating users that bid on public and unit price projects. It provides all the pieces needed for bid day: managing bid item prices, entering adjustments and generating the proposal.

Import a bid Item list from MS Excel®. Build up the bid item costs with Sage Timberline resources, rate tables, quantities, and man-hours using a historical database. Eos Unit Price imports the Sage Timberline Estimating costs, allocates add-ons and indirects, and accurately calculates the bid item prices. Quickly enter adjustments, lock bid items and spread differences across unlocked bid items. Generate the Bid Proposal with a click of a button. It's that easy.

FEATURES

- Imports unlimited bid items, quantities and costs from Sage Timberline Estimating
- Calculates and balances unit prices in seconds
- Supports bid item and takeoff quantities
- Allows manual adjustment of calculated unit prices and amounts
- Complete support for Sage Timberline add-on allocation rules, including support for multiple bond tables and different markups for different bid item groups
- Prorates indirect costs automatically
- Lock/unlock bid items
- Show/hide locked bid items, category cost and category add-ons
- Re-balance bid items and spread difference across open/unlocked bid items
- Manually override indirect cost allocation as required
- Generates a Bid Proposal when your unit prices are ready

BENEFITS

- Quickly set up your bid items by importing them from any MS Excel® compatible source (most State DOTs)
- Link to any Sage Timberline Estimating user defined WBS number for bid items and indirect costs
- Make revisions and adjustments quickly and easily
- Instantly view bid summary totals with each adjustment
- Changes made in Sage Timberline Estimating are easily reflected in Eos Unit Price
- Based on Microsoft Excel® for easy manipulation and reporting
